

Customer Journey Map

Date	02 July 2026
Team ID	xxxxxxx
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1 Discovery & Setup	Stage 2 Prediction	Stage 3 Analysis & Use
Actions	•Visits the app at 127.0.0.1:5000 •Reads the home page overview •Navigates to /predict	•Enters life expectancy,schooling, GNI •Clicks 'Predict HDI Score' •Views score and tier card	•Compares result against known tier •Calls /api/predict for batch data •Records result for report
Touchpoint	• Home page (index.html) • Navigation bar • Run aPrediction' button	•Prediction form (predict.html) •Input fields & validation • Submit button	•Result card with score & gauge •REST API JSON response •Methodology page(/about)
Customer Thought	•'Is this tool reliable?' • 'What data do I need?' •'How does HDI work?'	•'Will the model be accurate?' •'Which tier will it give?' •'Is my GNI input correct?'	•'Can I use this for policy?' •'What drives the score?' •'Can I export this result?'
Customer Feeling	Curious, slightly uncertain	Engaged, anticipatory	Satisfied, analytical

Process Ownership	Flask routing + Jinja2 rendering	ML model inference + validation	REST API + result display
Opportunities	• Add onboarding tooltip • Link to sample country data	• Show indicator ranges as hints • Add comparison mode	• Export result as PDF • Save prediction history
